Eldorado Gold Announces Completion of Skouries Mine Energization

Permanent grid power connection supports advance towards commercial production

VANCOUVER, BC – **Eldorado Gold Corporation** (TSX: ELD, NYSE: EGO) (“Eldorado” or the “Company”) today announced that the Skouries mine in northern Greece has been successfully energized following completion of the permanent connection to the Greek national power grid following final inspection, testing and approval by the Greek transmission authority.

“Site energization is an important step in advancing Skouries toward ramp up to steady-state operations and reflects the dedication and commitment of our team,” said George Burns, Chief Executive Officer. “The connection to permanent grid power supports the ongoing commissioning and ramp up of key systems across the site and provides the long-term power infrastructure required for the operation. Together with the recent achievement of first copper-gold concentrate production, this achievement demonstrates the strong progress being made at Skouries as we continue advancing one of Europe’s largest copper-gold projects toward commercial production.”

Connection to the national grid provides a reliable long-term power source for the operation and supports the continued advancement of processing and mining activities as the project progresses toward commercial production expected in the fourth quarter of 2026.

Main substation

Skouries is expected to produce on average 140,000 ounces of gold and 67 million pounds of copper annually over the life of mine.

Qualified Person

Simon Hille, FAusIMM, Executive Vice President, Chief Operating Officer, is the Qualified Person under National Instrument 43-101 responsible for preparing and supervising the preparation of the scientific or technical information contained in this news release and for verifying the technical data disclosed in this document relating to Skouries.

About Eldorado Gold

Eldorado is a gold, copper and base metals producer with mining, development and exploration operations in Canada, Türkiye, and Greece. The Company has a highly skilled and dedicated workforce, safe and responsible operations, a portfolio of high-quality assets, and long-term partnerships with local communities. Eldorado's common shares trade on the Toronto Stock Exchange (TSX: ELD) and the New York Stock Exchange (NYSE: EGO).

Cautionary Note about Forward-looking Statements and Information

Certain of the statements made and information provided in this news release are forward-looking statements or information within the meaning of the United States Private Securities Litigation Reform Act of 1995 and applicable Canadian securities laws. Often, these forward-looking statements and forward-looking information can be identified by the use of words such as “anticipate”, “believe”, “budget”, “continue”, “commitment”, “confident”, “estimate”, “expect”, “focus”, “forecast”, “foresee”, “future”, “goal”, “guidance”, “intend”, “opportunity”, “outlook”, “plan”, “potential”, “project”, “prospective”, “schedule”, “strive”, “target”, “underway”, “working” or the negatives thereof or variations of such words and phrases or similar words or statements that certain actions, events or results “can”, “could”, “likely”, “may”, “might”, “will” or “would” be taken, occur or be achieved.

Forward-looking statements or information contained in this news release include, but is not limited to, statements or information with respect to: the transition toward ramp up to steady-state operations for the Skouries Project; expected commercial production and expected timing thereof; expected benefits of site energization to the Skouries Project; continued commissioning and ramp up of key systems at the Skouries Project; expected gold and copper production of the Skouries Project annually over the life of mine; our belief that strong progress is being made at the Skouries Project; and generally our strategy, plans and goals, including our proposed development, construction, permitting, financing and operating potential, plans and priorities and related timelines and schedules.

Forward-looking statements and forward-looking information by their nature are based on a number of assumptions that management considers reasonable. However, if such assumptions prove to be inaccurate, then actual results, activities, performance, or achievements may be materially different from those described in the forward-looking statements or information. These include assumptions concerning, among other things: timing, costs and results of our construction and development activities, improvements and exploration, including at the Skouries Project, the McIlvenna Bay Project and our other operating mines and development projects; the current or future price of gold, copper and other commodities; the availability of financing for our exploration, development and operating activities and our ability to access existing project funding and remain in compliance with all covenants and contractual commitments related thereto; the geopolitical, economic, permitting and legal climate that we operate in, including recent disruptions to shipping operations in the Strait of Hormuz and Red Sea and any related shipping delays, shipping price increases, or impacts on the global energy market; availability of labour resources, including for construction, development and improvement activities; our ability to integrate the assets of Foran Mining Corporation, advance its exploration and development assets and to realize anticipated synergies and benefits therefrom; general business and economic conditions, including interest rates, inflation, commodity and power prices, credit and financial market conditions and the impact of foreign

exchange rates and tax rates and related frameworks; anticipated values, costs, expenses and working capital requirements; production and metallurgical recoveries; Mineral Reserves and Mineral Resources; our ability to develop, finalize and execute on our updated five-year strategic plan through 2030; acts of governments and the outcome of any legal or regulatory proceedings or other disputes that we may be involved in; our ability to continue to make purchases under our normal course issuer bid and to pay dividends; the impact of acquisitions, dispositions, suspensions or delays on our business; our ability to manage and mitigate the risks associated with our use of technology and artificial intelligence; the expected vesting and redemption outcomes under our compensation securities; our ability to address the negative impacts of climate change and adverse weather; consistency of agglomeration and our ability to optimize it in the future; the cost of, and extent to which we use, essential consumables; the impact and effectiveness of productivity initiatives; the time and cost necessary for anticipated overhauls of equipment; expected by-product grades; the effectiveness of our hedging programs; and our ongoing relations with regulators, communities, and our partners.

More specifically, with respect to the Skouries Project and updates, we have made additional assumptions regarding: our ability to continue executing our plans relating to the Skouries Project on the estimated existing project timeline and consistent with the current planned project scope; labour productivity, rates, and expected hours; inflation rates; the timeliness of shipping for important or critical items; our ability to continue accessing our project funding and remain in compliance with all covenants and contractual commitments related thereto; our ability to obtain and maintain all required approvals and permits, both overall and in a timely manner; the absence of further previously unidentified archaeological discoveries which would delay construction of various portions of the project; the future price of gold, copper, and other commodities; and the broader community engagement and social climate in respect of the Skouries Project.

In addition, except where otherwise stated, we have assumed a continuation of existing business operations on substantially the same basis as exists at the time of this news release. Even though we believe that the assumptions and expectations represented by such statements or information are reasonable, there can be no assurance that the forward-looking statements or information will prove to be accurate. Many assumptions may be difficult to predict and are beyond our control.

Forward-looking statements or information contained in this news release are subject to a variety of known and unknown risks, uncertainties and other factors which could cause actual events or results to differ from those expressed or implied by the forward-looking statements or information, including, but not limited to: commodity price risk; construction and development risks at the Skouries Project, the McIlvenna Bay Project and our other construction and development projects; changing political, economic and social conditions, including changes in governments or political systems, ongoing market uncertainty and global or regional geopolitical events, conflicts or disruptions; risks relating to our operations in foreign jurisdictions; risks related to production and processing; risks related to our improvement projects; our ability to integrate the assets of Foran Mining Corporation, advance its exploration and development assets and to realize anticipated synergies and benefits therefrom on the timelines expected or at all; delays and risks relating to surface construction, commissioning activities, ramp-up, and commercial production at McIlvenna Bay; our ability to obtain reliable supplies of power and water at a reasonable cost; prices of commodities and consumables; our reliance on significant amounts of critical equipment; our reliance on infrastructure, commodities and consumables, including risks from volatility and inflationary pressures as a result from the ongoing international conflict in Iran; inflation risk; risks related to fluctuations in the currency markets, including the Euro, Turkish lira, Canadian dollar and United States dollar; community relations and social license; environmental matters; geotechnical and hydrogeological structures, conditions or failures, including our ability to completely understand such structures and to mitigate such conditions or failures at a reasonable cost or at all; regulatory requirements as they relate to mine plan approvals; compliance with the Extractive Sector Transparency Measures Act (Canada); waste disposal; mineral tenure; permits, licenses and other authorizations; non-governmental organizations; reputational issues; climate change, including risks related to forest fires and water management; water collection, treatment and disposal operations at our mines, including the ability to manage unexpectedly large quantities of water; risk of spills or failure from our tailings operations (including circumstances beyond our control such as extreme weather, seismic events, prolonged droughts or heavy rainfall); environmental risks from our heap leaching operations, including hazardous materials management of our use of cyanide; change of control; actions of activist shareholders; estimation of Mineral Reserves and Mineral Resources; risks related to replacement of Mineral Reserves; regulatory reviews and different standards used to prepare and report Mineral Reserves and Mineral Resources; risks relating to any pandemic, epidemic, endemic or similar public health threats; regulated substances; acquisitions, including integration risks; dispositions; co-ownership of our properties; investment portfolio; volatility, volume fluctuations, and dilution risk in respect of our shares; competition; reliance on a limited number of smelters and off-takers; information and operational technology systems; liquidity and financing risks; indebtedness, including current and future operating restrictions, implications of a change of control, ability to meet debt service obligations, the implications of defaulting on obligations and changes in credit ratings; total cash costs per ounce and all in sustaining costs, including in relation to the market price of gold and the Company's profitability; interest rate risk; credit risk; tax matters; financial reporting, including relating to the carrying value of our assets and changes in reporting standards; the global economic environment; labour risks (availability of labour resources, including for construction, development and improvements activities, and their productivity; and risks relating to employee/union relations, employee misconduct, key personnel, skilled workforce, expatriates and contractors, reclamation and long-term obligations); turnover and attrition rates of labour, and related impacts thereto; the unavailability of insurance; Sarbanes-Oxley Act, applicable securities laws, and stock exchange rules; risks related to title and surface rights; risks relating to environmental, sustainability, health and safety, and governance matters; technology and cybersecurity risks; corruption, bribery, and sanctions; litigation and contracts; conflicts of interest; compliance with applicable laws, legislation and regulations; dividends; tariffs and

other trade barriers; and those risk factors discussed in the section titled “Risk Factors in Our Business” in the Company’s most recent Annual Information Form and Form 40-F. The reader is directed to carefully review our most recent Annual Information Form, Form 40-F and other regulatory filings filed on SEDAR+ and EDGAR under our Company name for a fuller understanding of the risks and uncertainties that affect the Company’s business and operations.

With respect to the Skouries Project, these risks, uncertainties and other factors may cause further delays in the completion of the construction and commissioning at the Skouries Project which in turn may cause delays in the commencement of production and further increases to the costs of the Skouries Project. The specific risks, uncertainties and other factors include, among others: our ability to efficiently manage the transitions from construction to commissioning to operations (including EPCM performance and owner team turn over); our ability to increase productivity by, among other things, adding or modifying labour shifts; rising labour costs or costs of key inputs such as materials, power and fuel; risks related to any unanticipated critical equipment defects or failures during the commissioning and ramp-up of operations; risks related to third-party contractors, including reduced control over aspects of the Company’s operations, and/or the ability of contractors to perform at required levels and according to baseline schedules, costs of any engineering rework and any commercial disputes that may arise from a contractor’s failure to meet these requirements; the ability of key suppliers to meet key contractual commitments in terms of schedules, amount of product delivered, cost, or quality and the impact of any vendor data errors; impacts to overhead costs related to the schedule; our ability to construct key infrastructure within the required timelines, including the process plant, filter plant, substation, waste management facilities, embankments, tailings conveyors, and water management infrastructure; the timely receipt of necessary permits and authorizations and our ability to comply with the terms of existing and future permits and authorizations; differences between projected and actual degree of pre-strip required in the open pit; variability in metallurgical recoveries and concentrate quality due to factors such as extent and intensity of oxidation or presence of transition minerals; presence of additional structural features impacting hydrological and geotechnical considerations; variability in minerals or presence of substances that may have an impact on filtered tails performance and resulting bulk density of stockpiles or filtered tails; distribution of sulfides that may dilute concentrate and change the characteristics of tailings; unexpected disruptions to operations including due to protests, non-routine regulatory inspections, road conditions, on site or labour unrest; unexpected inclement weather and climate events, including wildfires, short and long duration rainfall and floods and other extreme weather events and our site’s ability to respond to those events; our ability to meet pre-commercial producing mining or underground development targets; unexpected results from underground stopes; new archaeological discoveries requiring the completion of a regulatory process; changes in support from local communities; and our ability to meet the expectations of communities, governments, and stakeholders related to the Skouries Project. Our project capital and accelerated operational capital costs at Skouries are incurred primarily in Euros but are reported in US dollars and are therefore sensitive to fluctuations in the EUR/USD exchange rate.

The inclusion of forward-looking statements and information is designed to help you understand management’s current views of our near- and longer-term prospects, and it may not be appropriate for other purposes. There can be no assurance that forward-looking statements or information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Except as required by law, we do not expect to update forward-looking statements and information continually as conditions change and you are referred to the full discussion of the Company’s business contained in the Company’s reports filed with the securities regulatory authorities in Canada and the United States. Accordingly, you should not place undue reliance on the forward-looking statements or information contained herein.
