

Building our Future

BAML Conference

May 2015

Efemçukuru Gold Mine, Turkey

Forward Looking Statement

Certain of the statements made in this Presentation may contain forward-looking statements within the meaning of the United States Private Securities Litigation Reform Act of 1995 and forward-looking information within the meaning of applicable Canadian securities law. These forward-looking statements or information include, but are not limited to statements or information with respect to financial disclosure, estimates of future production, the future price of gold, estimations of mineral reserves and resources, estimates of anticipated costs and expenditures, development and production timelines and goals and strategies.

We have made numerous assumptions about the forward-looking statements and information contained herein, including among other things, assumptions about the price of gold, anticipated costs and expenditures and our ability to achieve our goals. Even though our management believes that the assumptions made and the expectations represented by such statements or information are reasonable, there can be no assurance that the forward-looking statement or information will prove to be accurate.

Forward-looking statements and forward-looking information by their nature are based on assumptions and involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements or information. Should one or more of these risks and uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward-looking statements or information. Such risks, uncertainties and other factors include, among others, the following: gold price volatility; risks of not meeting production and cost targets; discrepancies between actual and estimated production, mineral reserves and resources and metallurgical recoveries; mining operational and development risk; litigation risk; regulatory restrictions, including environmental regulatory restrictions and liability; risks of sovereign investment; currency fluctuations; speculative nature of gold exploration; global economic climate; dilution; share price volatility; the risks that the integration of acquired businesses may take longer than expected; the anticipated benefits of the integration may be less than estimated and the cost of acquisition may be higher than anticipated; the ability to complete acquisitions; competition; loss of key employees; additional funding requirements; share price volatility; community and non-governmental actions and defective title to mineral claims or property, as well as those factors discussed in our most recent interim and annual management discussion and analysis and in the sections entitled "Risk Factors" in the Company's Annual Information Form & Form 40-F dated March 27, 2015, including the risk factors incorporated by reference in such circular. Should one or more of these risks, uncertainties or other factors materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in forward-looking statements and information.

Although we have attempted to identify factors that would cause actual actions, events or results to differ materially from those described in forward-looking statements and information, there may be other factors that cause actual results, performances, achievements or events to not be as anticipated, estimated or intended. Also many of the factors are beyond our control. There can be no assurance that forward-looking statements or information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly you should not place undue reliance on forward-looking statements or information.

Except as required by law, we do not expect to update forward-looking statements and information continually as conditions change and you are referred to the full discussion of the Company's business contained in the Company's reports filed with the securities regulatory authorities in Canada and the U.S. All forward-looking statements and information contained in this presentation are qualified by this cautionary statement.

Cautionary Note to U.S. Investors: Mineral Reserves and Mineral Resources - The terms "mineral reserve", "proven mineral reserve" and "probable mineral reserve" referred to in the Company's disclosure are Canadian mining terms as defined in accordance with National Instrument 43-101 - Standards of Disclosure for Mineral Projects under the guidelines set out in the Canadian Institute of Mining, Metallurgy and Petroleum (the "CIM") Standards on Mineral Resources and Mineral Reserves, adopted by the CIM Council as amended from time to time by the CIM. These definitions differ from the definitions in the United States Securities & Exchange Commission ("SEC") Guide 7. Under SEC Guide 7 standards, a "final" or "bankable" feasibility study is required to report reserves, the three-year historic average price is used in any reserve or cash flow analysis to designate reserves and the primary environmental analysis or report must be filed with the appropriate governmental authority.

The terms "mineral resource", "measured mineral resource", "indicated mineral resource", "inferred mineral resource" used in the Company's disclosure are Canadian mining terms as defined in accordance with National Instrument 43-101 - Standards of Disclosure for Mineral Projects under the guidelines set out in the CIM Standards. Mineral resources which are not mineral reserves do not have demonstrated economic viability.

While the terms "mineral resource", "measured mineral resource", "indicated mineral resource", and "inferred mineral resource" are recognized and required by Canadian regulations, they are not defined terms under standards in the United States and normally are not permitted to be used in reports and registration statements filed with the SEC. As such, information contained in the Company's disclosure concerning descriptions of mineralization and resources under Canadian standards may not be comparable to similar information made public by U.S. companies in SEC filings. With respect to "inferred mineral resource" there is a great amount of uncertainty as to their existence and a great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of an "inferred mineral resource" will ever be upgraded to a higher category. Investors are cautioned not to assume that any part or all of mineral deposits in these categories will ever be converted into reserves.

Keeping it Consistent

Running a strong business

A global company

- Operations & projects in 5 countries
- Exceptional exploration potential
- Over 7,200 employees and contractors worldwide

Strong financial performance

- Total liquidity: ~\$870M
- ~\$494M in cash, cash equivalents and term deposits at March 31, 2015
- Available & undrawn credit facilities: \$375M

Strong operations

- 6 operating mines
- 2014 production: 789,224oz Au at cash costs of \$500/oz
- AISC: \$779/oz

Core strengths

- Experienced management team
- Consistent delivery on guidance and on budget
- Committed to the communities in which we operate

	FY 2014	2015 Guidance	Q1 2015
Gold production	311,233 oz	230,000-245,000 oz	79,256 oz
Cash operating costs	\$443/oz Au	\$600-650/oz Au	\$522/oz Au
Average grade	1.01 g/t Au	0.70 g/t Au	0.70 g/t Au

Forecast	2016	2017	2018	2019
K oz/yr	235-250	255-270	310-325	375-390

Capex during Q1:

- Capitalized waste stripping
- Construction of additional leach pad cells
- New overland conveyor
- 154 KV power line
- Substation

Turkey: Our Cornerstone Mines

Efemçukuru

	FY 2014	2015 Guidance	Q1 2015
Gold production	98,829 oz	90,000-100,000 oz	21,220 oz
Cash operating costs	\$573/oz Au	\$550-600/oz Au	\$604/oz Au
Average grade	8.34 g/t Au	7.80 g/t Au	7.32 g/t Au

Q1 Overview

- Extremely wet weather impacted tailings placement and site water management
- Still on track to meet production and cash cost guidance

China: Our Consistent Producers

Jinfeng

	FY 2014	2015 Guidance	Q1 2015
Gold production	168,503 oz	135,000-145,000 oz	36,686 oz
Cash operating costs	\$575/oz Au	\$660-700/oz Au	\$518/oz Au
Average grade	3.99 g/t Au	3.95 g/t Au	4.10 g/t Au

Q1 Overview

- Planned shutdown for preventative mill maintenance completed
- Cash operating costs 17% lower y-o-y due to lower mining contractor costs

China: Our Consistent Producers

Tanjianshan

	FY 2014	2015 Guidance	Q1 2015
Gold production	107,614 oz	90,000-100,000 oz	26,626 oz
Cash operating costs	\$389/oz Au	\$475-500/oz Au	\$407/oz Au
Average grade	3.69 g/t Au	3.36 g/t Au	3.57 g/t Au

Q1 Overview

- Cash operating costs 4% lower y-o-y due to lower processing costs
- Capex included: capitalized underground development and process plant improvements

China: Our Consistent Producers

White Mountain

	FY 2014	2015 Guidance	Q1 2015
Gold production	85,308 oz	70,000-75,000 oz	20,883 oz
Cash operating costs	\$617/oz Au	\$650-690/oz Au	\$600/oz Au
Average grade	3.47 g/t Au	3.28 g/t Au	3.55 g/t Au

Q1 Overview

- Lower production y-o-y due to reduced head grade and lower production from gold in circuit inventory
- Capex included: capitalized underground development, exploration drilling and sustaining capital projects in the processing plant

2015 Guidance

Asset	Production Guidance	Production Q1 2015	Cash Costs Guidance	Cash Costs Q1 2015

Industry Leading Growth: Greece

Growing the Halkidiki Mining District

Greece: Building Our Future

Skouries and Olympias

Skouries

- 2015 Budget: \$200 million in development capital
- Advance plant construction, tailings dam and exploratory drift for delineation and exploration drilling underground
- Commercial production 2017

Olympias

- 2015 Budget: \$110 million in development capital
- Continue Stratoni-Olympias access decline, underground mine development, tailings dam, Phase II plant
- Commissioning of plant in mid-2016
- ~1M tonnes of tailings remain for reclamation

Greece: Building Opportunities

Support continues to grow as projects advance

- \$450M invested in developing Skouries and Olympias since 2012
- Over 2,200 people directly employed (fivefold increase in two years)
- ~30% of container traffic through the Port of Thessaloniki is our business
- \$1B in direct taxes for the Greek government estimated over the next 20 years
- Potential export revenues of \$550M/year for Greece depending on metal prices
- Broad support from employees, unions, industry associations, local communities and the Canadian government
- Focused on responsible development, using industry best-practices and full compliance with safety and environmental regulations
- Committed to working with communities and governments to develop sustainable opportunities
- \$4 million provided to the Municipality of Aristotle to fund infrastructure improvements

Expenditure in Greece in 2014 ~\$260M

Romania & China: Quality Projects

Moving forward

Certej Highlights

- Completion of feasibility study expected in Q2 2015
- Construction of water treatment plant and site enhancements

Eastern Dragon Timeline

- PPA approval expected in Q2 2015
- Recommence construction in H2 2015

Notes on Mineral Resources and Reserves:

1. Mineral reserves and mineral resources are as of December 31, 2014.
2. Mineral reserves are included in the mineral resources.
3. The mineral reserves and mineral resources are disclosed on a total project basis.
4. The Olympias mineral reserves and mineral resources include 1.230 million tonnes of economically recoverable old tailings that grade 3.4 g/t Au. These are added into the gold and silver Proven reserve and Measured resource categories, respectively.

Thank You
