

INVESTOR PRESENTATION

MAY 2026

Skouries, Greece

Forward Looking Statement

Definitions and Photos: Capitalized terms used in this presentation but not otherwise defined herein have the meanings ascribed thereto in the Management's Discussion and Analysis dated April 30, 2026 of Eldorado Gold Corporation for the three months ended March 31, 2026 (the "MD&A"). Photos shown within the presentation were taken as recently as April 25, 2026.

Reporting Currency: All amounts are presented in U.S. dollars ("\$\$") unless otherwise stated. Unless otherwise specified, all tabular amounts are expressed in millions of U.S. dollars, except share, per share or per ounce amounts. Due to rounding, numbers presented throughout may not add precisely to the totals provided.

Cautionary Note about Forward-looking Statements and Information: Certain of the statements made and information provided in this presentation are forward-looking statements or forward-looking information within the meaning of the United States Private Securities Litigation Reform Act of 1995 and applicable Canadian securities laws. Often, these forward-looking statements and forward-looking information can be identified by the use of words such as "anticipates", "believes", "budgets", "continue", "commitment", "confident", "estimates", "expects", "forecasts", "foresees", "future", "goal", "guidance", "intends", "opportunity", "outlook", "plans", "potential", "projects", "prospective", "scheduled", "strives", or "targets" or the negatives thereof or variations of such words and phrases or statements that certain actions, events, or results "can", "could", "likely", "may", "might", "will", or "would" be taken, occur, or be achieved.

Forward-looking statements and forward-looking information contained in this presentation include, but are not limited to, statements or information with respect to: our expected production; our average mine life; our expectations on the re-rating potential of the Company; street consensus estimates in revenue commodity mix and NAV by jurisdiction; expected gold and copper production growth and key drivers; our expectations of margin expansion from cost discipline; our expectations of buybacks and quarterly dividends; our expectations of first concentrate production from the Skouries Project and expected timing thereof; our expectations of commercial production from the McIlvenna Bay Project and expected timing thereof; our expectations of the Olympias mill expansion project; reductions in the letter of credit backstopping the equity commitment for the Skouries project; our belief of a strong financial position and flexibility to fund growth; our belief that our strong growth and cash flow will drive re-rating potential; consensus estimates of free cash flow, EBITDA, P/NAV and EV/2027E EBITDA; expected progress of construction for the Skouries Project; our expectations of the Sigma Mill expansion study for the Lamaque Complex; in relation to McIlvenna Bay, expected inaugural resource on the Tesla Zone and timing thereof, and progress of surface construction; in relation to Kisladag, expected whole ore agglomeration, installation of a larger secondary crusher, and opportunities for the open pit at the Kisladag project to support resource expansion; expected 80% increase in GEO production; our belief of a robust balance sheet and expectations to fund our growth initiatives; our belief that we are on track to become one of the EU's largest copper producers; forward-looking non-IFRS measures; and generally our strategy, plans, goals and priorities.

Forward-looking statements and forward-looking information by their nature are based on a number of assumptions that management considers reasonable. However, if such assumptions prove to be inaccurate, then actual results, activities, performance, or achievements may be materially different from those described in the forward-looking statements or information. These include assumptions concerning: timing, cost and results of our construction and development activities, improvements, and exploration; the future price of gold, copper, and other commodities; receipt of all required permits on the timelines we expect; the global concentrate market; exchange rates; anticipated values, costs, expenses and working capital requirements; the successful integration of the assets and operations from the acquisition of Foran Mining Corporation, and the realization of benefits derived therefrom; our ability to continue accessing our project funding and remain in compliance with all covenants and contractual commitments related thereto; availability of labour resources, including for construction, development and improvements activities; production and metallurgical recoveries; Mineral Reserves and Mineral Resources; our ability to effectively use invested capital and unlock potential expansion opportunities across the portfolio; our ability to address the negative impacts of climate change and adverse weather; consistency of agglomeration and our ability to optimize it in the future; the cost of, and extent to which we use, essential consumables (including fuel, explosives, cement, and cyanide); the impact and effectiveness of productivity initiatives; the time and cost necessary of shipping for important or critical items for construction, development and improvements activities or for anticipated overhauls of equipment; expected by-product grades; the use, and impact or effectiveness, of growth capital; the impact of acquisitions, dispositions, suspensions or delays on our business; the sustaining capital required for various projects; and the geopolitical, economic, permitting and legal climate that we operate in.

More specifically, with respect to the Skouries Project and updates, we have made additional assumptions regarding: our ability and our contractors' ability to recruit and retain labour resources within the required timeline; labour productivity, rates, and expected hours; inflation rates; the expected scope of project management frameworks; our ability to continue executing our plans relating to the Skouries Project on the estimated existing project timeline and consistent with the current planned project scope; the timeliness of shipping for important or critical items; our ability to continue accessing our project funding and remain in compliance with all covenants and contractual commitments related thereto; our ability to obtain and maintain all required approvals and permits, both overall and in a timely manner; our ability to obtain the requisite inspections and approvals for energization of the power supply from the power authority in a timely manner; the absence of further previously unidentified archaeological discoveries which would delay construction of various portions of the project; the future price of gold, copper, and other commodities; and the broader community engagement and social climate in respect of the Skouries Project.

In addition, except where otherwise stated, Eldorado has assumed a continuation of existing business operations on substantially the same basis as exists at the time of this presentation. Even though we believe that the assumptions and expectations represented by such statements or information are reasonable, there can be no assurance that the forward-looking statement or information will prove to be accurate. Many assumptions may be difficult to predict and are beyond our control.

Furthermore, should one or more of the risks, uncertainties and other factors materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those described in the forward-looking statements or information. Generally, these risks, uncertainties, and other factors include, among others: commodity price risk; development risks at Skouries, McIlvenna Bay, and other construction and development projects including the ability of key suppliers to meet key contractual commitments in terms of schedules, amount of product delivered, cost, or quality and our ability to construct key infrastructure within the required timelines, and unexpected inclement weather and climate events that may delay timelines; risks relating to our operations in foreign jurisdictions; risks related to production and processing; integration risks relating to the acquisition of Foran Mining Corporation, including the possibility that anticipated benefits from the acquisition are not realized on the timeline expected or at all; delays and risks relating to surface construction, commissioning activities, ramp-up, and commercial production at McIlvenna Bay; our ability to secure supplies of power and water at a reasonable cost; prices of commodities and consumables; our reliance on significant amounts of critical equipment; our reliance on infrastructure, commodities and consumables; inflation risk; community relations and social license; risks related to title and surface rights; environmental, health and safety matters; our ability to completely understand geotechnical structures, geotechnical and hydrogeological conditions or failures, and our ability to mitigate such conditions or failures at a reasonable cost, or at all; regulatory requirements as they relate to mine plan approvals; compliance with the *Extractive Sector Transparency Measures Act* (Canada); waste disposal; mineral tenure; permits, licences and other authorizations; non-governmental organizations; reputational issues; climate change; change of control; actions of activist shareholders; estimation of Mineral Reserves and Mineral Resources; risks related to replacement of mineral reserves; regulatory reviews and different standards used to prepare and report Mineral Reserves and Mineral Resources; risks relating to any pandemic, epidemic, endemic, or similar public health threats; regulated substances; acquisitions, including general integration risks; dispositions; co-ownership of our properties; investment portfolio; volatility, volume fluctuations, and dilution risk in respect of our shares; competition; reliance on a limited number of smelters and off-takers; information and operational technology systems; liquidity and financing risks; indebtedness (including current and future operating restrictions, implications of a change of control, ability to meet debt service obligations, the implications of defaulting on obligations and changes in credit ratings); total cash costs per ounce and AISC (particularly in relation to the market price of gold and the Company's profitability); currency risk; interest rate risk; credit risk; tax matters; financial reporting (including relating to the carrying value of our assets and changes in reporting standards); the global economic environment; labour risks (availability of labour resources, including for construction, development and improvements activities, and their productivity; and risks relating to employee/union relations, employee misconduct, key personnel, skilled workforce, expatriates, and contractors); turnover and attrition rates of labour, and related impacts thereto; default on obligations; current and future operating restrictions; reclamation and long-term obligations; credit ratings; change in reporting standards; the unavailability of insurance; Sarbanes-Oxley Act, applicable securities laws, and stock exchange rules; risks relating to environmental, sustainability, and governance practices and performance; corruption, bribery, and sanctions; employee misconduct; litigation and contracts; conflicts of interest; compliance with privacy legislation; dividends; cyber security risk; and international conflict and other geopolitical tensions and events, including war, tariffs and other trade barriers; and those risk factors discussed in our most recent Annual Information Form & Form 40-F. The reader is directed to carefully review the detailed risk discussion in our MD&A and our most recent Annual Information Form & Form 40-F filed on SEDAR+ and EDGAR under our Company name, for a fuller understanding of the risks and uncertainties that affect our business and operations.

With respect to the Skouries Project, these risks, uncertainties and other factors may cause further delays in the completion of the construction and commissioning at the Skouries Project which in turn may cause delays in the commencement of production, and further increase to the costs of the Skouries Project. The specific risks, uncertainties and other factors include, among others: our ability, and the ability of our construction contractors to recruit the required number of personnel (both skilled and unskilled) with required skills within the required timelines, and to manage changes to workforce numbers through the construction of the Skouries Project; our ability to recruit personnel having the requisite skills, experience, and ability to work on site; our ability to efficiently manage the transitions from construction to commission to operations; our ability to increase productivity by, among other things, adding or modifying labour shifts; rising labour costs or costs of key inputs such as materials, power and fuel; risks related to any unanticipated critical equipment defects or failures during the commissioning and ramp-up of operations; risks related to third-party contractors, including reduced control over aspects of the Company's operations, and/or the ability of contractors to perform at required levels and according to baseline schedules and any commercial disputes that may arise from a contractor's failure to meet these requirements; the ability of key suppliers to meet key contractual commitments in terms of schedules, amount of product delivered, cost, or quality; impacts to overhead costs related to the schedule; our ability to construct key infrastructure within the required timelines, including the process plant, filter plant, substation, waste management facilities, embankments, tailings conveyors, water management infrastructure, and control centre; the timely receipt of necessary permits and authorizations; differences between projected and actual degree of pre-strip required in the open pit; variability in metallurgical recoveries and concentrate quality due to factors such as extent and intensity of oxidation or presence of transition minerals; presence of additional structural features impacting hydrological and geotechnical considerations; variability in minerals or presence of substances that may have an impact on filtered tails performance and resulting bulk density of stockpiles or filtered tails; distribution of sulfides that may dilute concentrate and change the characteristics of tailings; unexpected disruptions to operations due to protests, non-routine regulatory inspections, road conditions, or labour unrest; unexpected inclement weather and climate events, including wildfires, short and long duration rainfall and floods and other extreme weather events; our ability to meet pre-commercial producing mining or underground development targets; unexpected results from underground stopes; new archaeological discoveries requiring the completion of a regulatory process; changes in support from local communities; and our ability to meet the expectations of communities, governments, and stakeholders related to the Skouries Project. Our project capital and accelerated operational capital costs at Skouries are incurred primarily in Euros but are reported in US dollars and are therefore sensitive to fluctuations in the EUR/USD exchange rate.

The inclusion of forward-looking statements and information is designed to help you understand management's current views of our near- and longer-term prospects, and it may not be appropriate for other purposes. There can be no assurance that forward-looking statements or information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Accordingly, you should not place undue reliance on the forward-looking statements or information contained herein. Except as required by law, we do not expect to update forward-looking statements and information continually as conditions change and you are referred to the full discussion of the Company's business contained in the Company's reports filed with the securities regulatory authorities in Canada and the United States.

This presentation contains information that may constitute future-orientated financial information or financial outlook information (collectively, "FOFI") about Eldorado's prospective financial performance, financial position or cash flows, all of which is subject to the same assumptions, risk factors, limitations and qualifications as set forth above. Readers are cautioned that the assumptions used in the preparation of such information, although considered reasonable at the time of preparation, may prove to be imprecise or inaccurate and, as such, undue reliance should not be placed on FOFI. Eldorado's actual results, performance and achievements could differ materially from those expressed in, or implied by, FOFI. Eldorado has included FOFI in order to provide readers with a more complete perspective on Eldorado's future operations and management's current expectations relating to Eldorado's future performance. Readers are cautioned that such information may not be appropriate for other purposes. FOFI contained herein was made as of the date of the MD&A, which is available on the Company's website and filed on Sedar+ and EDGAR. The forward-looking total cash costs, AISC, sustaining capital and growth capital disclosed in this presentation has been calculated with both the methodology disclosed in the MD&A as it relates to the equivalent historical non-IFRS measure (that is, there are no significant differences in methodology between the historic and forward-looking non-IFRS measures). Unless required by applicable laws, Eldorado does not undertake any obligation to publicly update or revise any FOFI statements, whether as a result of new information, future events or otherwise.

Non-IFRS Measures

Certain non-IFRS financial measures and ratios are included in this presentation, including total cash costs (\$/oz sold), all-in sustaining costs ("AISC") (\$/oz sold), adjusted net earnings, adjusted net earnings per share, adjusted EBITDA, cash flow from operating activities before changes in working capital, free cash flow, and free cash flow excluding Skouries. In the gold mining industry, these are common performance measures but may not be comparable to similar measures presented by other issuers.

The Company believes that these measures and ratios, in addition to conventional measures and ratios prepared in accordance with International Financial Reporting Standards ("IFRS"), provide investors an improved ability to evaluate the underlying performance of the Company. The non-IFRS and other non-financial measures and ratios are intended to provide additional information to assist in their evaluation of the Company's performance and ability to generate cash flow from operating activities and should not be considered in isolation or as a substitute for measures or ratios of performance prepared in accordance with IFRS. These measures and ratios do not have any standardized meaning prescribed under IFRS, and therefore may not be comparable to other issuers.

Certain additional disclosures for these non-IFRS measures, including quantitative reconciliations to the most directly comparable IFRS financial measures, are incorporated by reference herein and can be found in the section 'Non-IFRS and Other Financial Measures and Ratios' starting at page 25 in the MD&A that will be available on SEDAR+ at <http://www.sedarplus.com>, on EDGAR at www.sec.gov, and on the Company's website under the 'Investors' section.

The most directly comparable IFRS financial measures and results from the quarter ended March 31, 2026, and year ended December 31, 2025 are below.

Non-IFRS Measure	Most Directly Comparable IFRS Measure	Q1 2026	FY 2025
Total cash costs	Production costs	\$188.2 M	\$677.6 M
AISC			
Average realized gold price per ounce sold	Revenue	\$532.4 M	\$1,818.9 M
EBITDA	Earnings from continuing operations before income tax	\$246.7 M	\$544.3 M
Adjusted EBITDA			
Adjusted net earnings/(loss)	Net earnings attributable to shareholders of the Company from continuing operations	\$136.4 M	\$519.9 M
Adjusted net earnings/(loss) per share			
Cash flow from operating activities before changes in working capital	Net cash generated from operating activities of continuing operations	\$141.4 M	\$742.5 M
Free cash flow			
Free cash flow excluding Skouries			
Sustaining capital expenditures	Additions to property, plant and equipment	\$318.0 M	\$978.9 M
Growth capital expenditures

Why Eldorado?

Metal diversity, geographic diversity, free cash flow

+40%

gold production growth by 2028¹

GROWTH PIPELINE

- » Skouries first concentrate Q3 2026
- » Mcllvenna Bay commercial production Q3 2026
- » Olympias mill expansion to 650ktpa

\$630M

cash and cash equivalents as at March 31, 2026

FINANCIAL STRENGTH

- » \$788M total liquidity
- » Skouries fully financed (€680M facility)
- » Strategic leverage to copper

0.5x

P/NAV compared to peer average of 0.76

ATTRACTIVE VALUATION

- » Re-rating potential as Greek assets deliver
- » Margin expansion from cost discipline
- » Buybacks +7.5¢ quarterly dividend

AAA

MAC-TSM tailings rating

SUSTAINABILITY

- » 40% of GHG mitigation target achieved²
- » Filtered tailings across applicable operations

3-year gold production growth profile

Gold production growing ~40% by 2028 • Copper production starting 2026

GOLD PRODUCTION (KOZ)^{1,2}

COPPER (M LBS)³

*Life of Mine Average Annual Production
Skouries & Mcllvenna Bay*

KEY DRIVERS

Skouries & Mcllvenna Bay ramp-up

Gold + copper production starting 2026

Existing operations

Stable production base, growth optimization initiatives underway

Exploration: A Pipeline of Discovery

High-grade hits • New discoveries • Scaled-up 2026 budget

~\$100M
2026 EXPLORATION BUDGET

GREECE • OLYMPIAS NW ZONE

Exceptional Grades Adjacent to Mine Infrastructure

- Refreshed integrated, multidisciplinary geoscience approach to:
 - » NW Zone ▶ Precious metal rich structures crossing Olympias style
 - » West Flats ▶ Thick massive sulphides beyond the existing resource
- Focus targeting to unlock high-value opportunities

~18,000 m of expansion drilling at surface and u/g planned at Olympias in 2026

SASKATCHEWAN • TESLA ZONE

Significant Discovery, 300 m from McIlvenna Bay deposit

- Exploration target range¹: 28–45 Mt of mineralization
 - » Based on ~86,000 m drilled to date through multiple lenses
 - » 1,200 m+ in length, 500–700 m widths, open down-dip & lateral
- Numerous targets on large, under-explored land position

Inaugural Mineral Resource expected H2 2026

GREECE • STRATONI SKARN

An Emerging Gold-Copper System

- Newly identified skarn alteration system with copper domains
 - » ~1.5 km long × 0.5 km wide zone ▶ open in multiple directions
- First gold-copper target in a district known for carbonate-replacement deposits

~15,000 m of follow-up drilling planned in 2026 focused on assessing continuity

QUÉBEC • LAMAQUE COMPLEX

High-Grade Vein Extensions in the District

- Ormaque SE, Ormaque West & Lamaque South
 - » Extensions of known deposits ▶ similar mining and recovery
 - » Proximal to existing infrastructure ▶ potential mill feed
- Untapped potential in wider property, including Bonfond

~80,000–90,000 m planned in 2026 across Lamaque & Bourlamaque properties

Strong Financial Position – Flexibility to Fund Growth

BUYBACKS (2025 & Q1 2026)

~\$300_M

share repurchases

(1) As per the Consolidated Q1 2026 Financial Statements. (2) Eldorado's equity commitment for the Skouries project is back-stopped by a letter of credit issued, which reduces the availability under the Senior Secured Credit Facility. On June 27, 2024, Eldorado entered into \$350 million amended and restated senior secured credit facility with an option to increase the available credit by \$100 million through an accordion feature and a maturity date of June 27, 2028. (3) Interest paid semi-annually on March 1 and September 1. (4) This includes a €480.4 million commercial loan facility, €200.0 million of funds from the Greek Recovery and Resilience Fund and an undrawn contingent overrun facility for an additional €60.0 million (together the "Term Facility"). The Term Facility is non-recourse to Eldorado Gold Corporation and is secured by the Skouries Project and the Hellas Gold operating assets.

Peer-Leading Growth

Strong growth and cash flow drive clear re-rating potential

(1) Gold equivalent ounces (GEO): Based on public disclosure assuming street consensus analyst prices of US\$3,965/oz Au, US\$47.54/oz Ag, US\$5.02/lb Cu and US\$1.26/lb Zn in 2027. (2) Free cash flow based on street consensus estimates as per FactSet (March 2026), calculated as operating cash flow less capex. (3) EBITDA calculated as revenue based on public disclosure less cash operating costs based on street consensus analyst estimates as per S&P CapIQ

Significant Re-Rating Opportunity

Skouries and McIlvenna Bay into production this year expected to drive re-rate

Notes on Mineral Resources and Reserves

GENERAL

Mineral Reserves and Mineral Resources are as of September 30, 2025

The Mineral Reserves and Mineral Resources were classified using logic consistent with the CIM Definition Standards for Mineral Resources & Mineral Reserves (2014) incorporated, by reference, into National Instrument 43-101 – *Standards of Disclosure for Mineral Projects* (“NI 43-101”). Sample preparation, analytical techniques, laboratories used, and quality assurance and quality control protocols used during exploration drilling programs are done consistently with industry standards and independent certified assay labs are used.

Mineral Reserves are included in the Mineral Resources.

The Mineral Reserves and Mineral Resources are disclosed on a total project basis.

Measured and Indicated Mineral Resources which are not Mineral Reserves, do not have demonstrated economic viability. With respect to “Inferred Mineral Resources”, there is a great amount of uncertainty as to their existence and uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of a “Measured Mineral Resource”, “Indicated Mineral Resource” or “Inferred Mineral Resource” will ever be upgraded to a higher category.

Additional information on the Kisladag, Efemcukuru, Olympias, Skouries and Lamaque mineral properties mentioned in this presentation (all of which are considered to be material mineral properties to the Company) are contained in Eldorado’s annual information form for the year ended December 31, 2024 and the following technical reports for each of those properties, all of which are available under the Company’s profile at www.sedarplus.com and www.sec.gov:

- Amended Technical report entitled “Technical Report, for the Lamaque Complex, Quebec, Canada” with an effective date of December 31, 2024.
- Technical report entitled “Technical Report, Olympias Mine, Greece” with an effective date of December 31, 2023.
- Technical report entitled “Technical Report, Efemcukuru Gold Mine, Turkiye” with an effective date of December 31, 2023.
- Technical report entitled “Technical Report, Skouries Project, Greece” with an effective date of January 22, 2022.
- Technical report entitled “Technical Report, Kisladag Gold Mine, Turkiye” with an effective date of January 17, 2020.

QUALIFIED PERSONS

Simon Hille, FAusIMM, EVP & COO, is the “qualified person” under NI 43-101 responsible for preparing and supervising the preparation of the scientific or technical information contained in this presentation and verifying the technical data disclosed in this document relating to our operating mines and development projects, unless otherwise noted. Additional qualified persons have approved disclosures for specific properties as detailed in “Mineral Reserve Notes” and “Mineral Resource Notes” below. Jessy Thelland, géo (OGQ No. 758), Director Technical Services Lamaque, a member in good standing of the Ordre des Géologues du Québec, is the qualified person as defined in NI 43-101 responsible for, and has verified and approved, the scientific and technical disclosure contained in this presentation for the Quebec projects.

CAUTIONARY NOTE TO US INVESTORS CONCERNING ESTIMATES OF MEASURED, INDICATED AND INFERRED RESOURCES

There are differences between the standards and terms used for reporting mineral reserves and resources in Canada, and in the United States pursuant to the United States Securities and Exchange Commission’s (the “SEC”). The terms Mineral Resource, Measured Mineral Resource, Indicated Mineral Resource and Inferred Mineral Resource are defined by the Canadian Institute of Mining, Metallurgy and Petroleum (CIM) and the CIM Definition Standards on Mineral Reserves and Mineral Resources adopted by the CIM Council, and must be disclosed according to Canadian securities regulations.

These standards differ from the requirements of the SEC applicable to domestic United States reporting companies. Accordingly, information contained in this presentation with respect to mineral deposits may not be comparable to similar information made public by United States companies subject to the SEC’s reporting and disclosure requirements.

Notes on Mineral Reserves

MINERAL RESERVE NOTES

Eldorado reports Mineral Reserves in accordance with CIM Definition Standards. Mineral Reserves for the operating sites (Efemcukuru, Kisladag, Olympias, and within the Lamaque Complex – Ormaque, Triangle, Parallel and Plug #4) and the Skouries and Perama Hill projects were determined using a long-term gold price of \$1,700/oz. A reserve test is undertaken every year to confirm future undiscounted cash flow from the reserve mine plan is positive.

LONG-TERM METAL PRICE ASSUMPTIONS

Gold price: \$1,700/oz
 Silver price: \$20.00/oz
 Copper price: \$3.50/lb; \$7,714/tonne
 Lead price: \$2,000/t
 Zinc price: \$2,500/t

CUT-OFF GRADES

Efemcukuru: \$145.36/t NSR (long hole stoping), \$151.76/t NSR (drift and fill); Kisladag: 0.1575 g/t Au Recoverable; Lamaque Complex: 4.19 g/t Au (long hole stoping), 4.54 g/t Au (drift and fill); Olympias: \$223.40/t NSR; Perama Hill: 0.85 g/t Au; Skouries: \$15.00/t NSR (open pit), \$40.00/t NSR (underground).

Qualified Persons: The following persons, all of whom are qualified persons under NI 43-101, are as follows:

Asset	Mining Type(s)	Qualified Person	Company
Lamaque Complex: Triangle, Plug #4	Underground	Jessy Thelland, géo (OGQ No. 758), Technical Services Director Lamaque	Eldorado Gold
Lamaque Complex: Ormaque, Parallel	Underground	Phillippe Groleau, Eng. (OIQ No. 5032770), Senior Strategic Planner	Eldorado Gold
Kisladag	Open Pit	Raj Priyadarshi, P.Eng., Manager, Open Pit Mine Planning	Eldorado Gold
Efemcukuru	Underground	Mike Tsafaras, P.Eng., Director, Mine Planning	Eldorado Gold
Olympias	Underground	Filip Medinac, P.Eng., Technical Services Manager, Olympias	Eldorado Gold
Skouries	Open Pit and Underground	Mike Tsafaras, P.Eng., Director, Mine Planning	Eldorado Gold
Perama Hill	Open Pit	Mike Tsafaras, P.Eng., Director, Mine Planning	Eldorado Gold

Notes on Mineral Resources

Mineral Resource Notes: Eldorado reports Mineral Resources in accordance with CIM Definition Standards. All Mineral Resources are assessed for reasonable prospects for eventual economic extraction (RPEEE). The Resource cut-off grades or values (e.g. gold equivalent) are determined using a long-term gold price (\$2,100/oz) and modifying factors derived in the resource to reserve conversion process (or by comparison to similar projects for our resource-only properties). These values are then used to create constraining volumes that provide limits to the reported Resources. Resource grades are reported undiluted from within the constraining volumes that satisfy RPEEE.

Open Pit Resources used pit shells created with the long-term gold price to constrain reportable model blocks. Underground Resources were constrained by volumes whose design was guided by a combination of the reporting cut-off grade or value, contiguous areas of mineralization and mineability. Eldorado's Mineral Resources are inclusive of Reserves.

Long-Term Metal Price Assumptions:

Gold price: \$2,100/oz | Silver price: \$24.00/oz | Copper price: \$4.15/lb; \$9,147/tonne | Lead price: \$2,200/t | Zinc price: \$2,800/t

Mineral Resource Reporting and demonstration of Reasonable Prospects for Eventual Economic Extraction: The Mineral Resources used a long term look gold metal price of \$2,100/oz for the determination of resource cut-off grades or values. This guided execution of the next step where constraining surfaces or volumes were created to control resource reporting. Only material internal to these volumes were eligible for reporting. Projects with both open pit and underground Resources have the open pit Resources constrained by an open pit/underground economic crossover surface, and underground Resources constrained by a reporting shape.

Cut-off Grades: Bonnefond: 3.0 g/t Au; Efemcukuru: \$104.50/t NSR; Kisladag: 0.13 g/t Au (recoverable); Lamaque Complex (Triangle, Plug #4, Parallel): 3.4 g/t Au; Ormaque 3.67 g/t Au (drift and fill); Olympias: \$105.50/t NSR; Perama Hill – Oxide & Sulphide: 0.71 g/t Au; Perama South: 0.50 g/t Au; Piavitsa: 4.0 g/t Au; Sapes: 2.5 g/t Au (underground), 1.0 g/t Au (open pit); Skouries: \$15/t NSR (open pit), \$40/t NSR (underground); Stratoni: \$200/t NSR, based on Zn equivalent grade of 10%.

Qualified Persons: The following persons, all of whom are qualified persons under NI 43-101, have approved the disclosure contained within this presentation:

Asset	Mining Type(s)	Qualified Person	Company
Lamaque Complex: Triangle, Plug #4, Ormaque, Parallel	Underground	Jessy Thelland, géo (OGQ No. 758), Technical Services Director, Lamaque	Eldorado Gold
Bonnefond	Underground	Karine Brousseau, Eng. (OIQ No. 121871), Senior Manager, Resource Geology	Eldorado Gold
Kisladag	Open Pit	Karine Brousseau, Eng. (OIQ No. 121871), Senior Manager, Resource Geology	Eldorado Gold
Efemcukuru	Underground	Karine Brousseau, Eng. (OIQ No. 121871), Senior Manager, Resource Geology	Eldorado Gold
Olympias	Underground	Karine Brousseau, Eng. (OIQ No. 121871), Senior Manager, Resource Geology	Eldorado Gold
Skouries	Open Pit	Sean McKinley, P.Geo., Manager, Mine Geology & Advanced Projects	Eldorado Gold
Skouries	Underground	Sean McKinley, P.Geo., Manager, Mine Geology & Advanced Projects	Eldorado Gold
Perama Hill	Open Pit	Karine Brousseau, Eng. (OIQ No. 121871), Senior Manager, Resource Geology	Eldorado Gold
Perama South	Open Pit	Karine Brousseau, Eng. (OIQ No. 121871), Senior Manager, Resource Geology	Eldorado Gold
Piavitsa	Underground	Sean McKinley, P.Geo., Manager, Mine Geology & Advanced Projects	Eldorado Gold
Sapes	Underground & Open Pit	Sean McKinley, P.Geo., Manager, Mine Geology & Advanced Projects	Eldorado Gold
Stratoni	Underground	Sean McKinley, P.Geo., Manager, Mine Geology & Advanced Projects	Eldorado Gold

Mcllvenna Bay 2024 Mineral Reserve and Mineral Resource Estimate

Reserves	Tonnes (Mt)	Cu (%)	Zn (%)	Au (g/t)	Ag (g/t)	CuEq (%)
Total Reserves	29.7	1.21%	2.17%	0.44	14.4	2.51%
Resources	Tonnes (Mt)	Cu (%)	Zn (%)	Au (g/t)	Ag (g/t)	CuEq (%)
Total Indicated	38.6	1.19%	2.18%	0.41	14.40	2.02%
Total Inferred	4.5	0.93%	2.60%	0.28	15.80	1.77%

1. Effective date for Mineral Resources of November 16, 2024; CIM definitions were followed for Mineral Resources.
2. The mineral resource is estimated based on 271 diamond drill holes and a NSR cut-off of US\$70/t. NSR values were derived, and high-grade caps were applied as per the discussion in Estimation Methodology and Parameters and include provisions for metallurgical recovery and estimates of current shipping terms and smelter rates for similar concentrates. Metal prices used are US\$4.83/lb. Cu, US\$1.37/lb. Zn, US\$2,336/oz. Au, and US\$29.72/oz. Ag. Lead contributes no value.
3. Rock density was interpolated for each block based on measurements taken from core specimens, with an average value of 3.56 g/cm³ for the main MS lens and 2.86 g/cm³ for the CS Zone.
4. Mineral resources that are not mineral reserves do not have demonstrated economic viability.
5. The block model grades were estimated using the Ordinary Kriging interpolation method, with search parameters derived from geostatistical analysis performed within the mineralization wireframes. Variogram ranges are from 65 m to 85 m for Au and Ag in the major axis and up to 100 m to 120 m for Cu and Zn.
6. Micon's QP has not identified any legal, political, environmental, or other factors that could materially affect the potential development of the mineral resource estimate.
7. The mineral resource estimates are classified according to the CIM Definition Standards, which define a Mineral Resource as "a concentration or occurrence of solid material of economic interest in or on the earth's crust in such form, grade or quality and quantity that there are reasonable prospects for eventual economic extraction. The location, quantity, grade or quality, continuity and other characteristics of a mineral resource are known, estimated or interpreted from specific geological evidence and knowledge including sampling."
8. The mineral resource was categorized based on geological confidence into inferred and indicated categories. An inferred mineral resource has the lowest level of confidence. An indicated mineral resource has a higher level of confidence than an inferred mineral resource. It is reasonably expected that the majority of the inferred mineral resources could be upgraded to indicated mineral resources with additional infill drilling.
9. Effective date for Mineral Reserves of November 21, 2024, CIM definitions were followed for Mineral Reserves.
10. Mineral Reserves include transverse, longitudinal, and Avoca stopes, as well as ore development, marginal development, and incremental stopes.
11. Stopes were estimated at a cut-off value of US \$92.50/tonne NSR.
12. Marginal tonnes were estimated at a cut-off value of US \$73.97/tonne NSR.
13. A minimum mining width of 3.0 m was applied for all stoping.
14. Numbers may not sum due to rounding.
15. NSR Reserve Prices (US\$); Cu \$4.20/lb, Zn \$1.19/lb, Ag \$25.84/oz, Au \$2031/oz
16. Mr. Mark Hatton, P.Eng. of Stantec Inc. has reviewed and verified this mineral reserve estimate. Mr. Hatton is independent of Foran and is a "Qualified Person" within the meaning of National Instrument 43-101.
